4. You will be asked for your username or Email - for all parents, your username is your email address. Enter the email address that you provided to the school and click “send verification code.”

The screenshot shows a web form titled "Password Reset" with a "Restart" button and a close icon. The text reads: "Forgot your password? It happens. Follow these 3 simple steps to reset your password. If you want to start over, click 'Restart' at the top. If you need help, contact us at [support@schooldata.net](mailto:support@schooldata.net) and we'll guide you through the process, step-by-step." Below this is a heading "1. Tell us who you are" with a dropdown arrow. The instructions state: "We need to know who you are before we can reset your password. Enter your email address or username below and click 'Send Verification Code'. We'll email you a special code to enter in the next step." There is a text input field labeled "Username or Email:" and a blue button labeled "Send Verification Code". At the bottom, there are two more steps: "2. Enter your code" and "3. Create a secure password", both with dropdown arrows.

5. Check that email address for a message from School Data Solutions. Be sure to check your spam folder as sometimes the auto generated emails are routed there.
6. Copy and paste or enter the code you receive from your email into the verification screen and once verified, create your new password.

The screenshot shows the same "Password Reset" form, now at step 2. The heading is "2. Enter your code" with a dropdown arrow. The instructions state: "We just sent you an email. Go check your email, copy that code, and enter it below." There is a text input field labeled "Verification Code:" and a link below it that says "(Don't see the email? [Click here and we'll resend it.](#))". At the bottom, there is a heading "3. Create a secure password" with a dropdown arrow.

7. Each time you login, you will use your email address and your password will be whatever you set it to be. Each time you will log in through the second screen after clicking on the “Use SchoolData.net Account” button.
8. Follow these same steps if you forget your password or need to reset it for any reason. Passwords are not stored in the system.
